

ST MIXING TANK

S.U.G ST mixing tank is suitable for concrete and cement material. This machine is working together with grouting pump, they have been using for sealing, strengthening and stabilizing of rock and soil in Tunneling, Mining, Hydro-power Project, Slope Stabilizing and underground project, etc.

Technical Data

Mixing tank capability :	550L
Mixing speed :	50r/min
Main motor :	4kw 380v
Overall Dimension :	1000x450x1200 mm
Weight :	200kg

Working Date

For the structure of ST, please refer to the Fig.1. Water and cement as rate put into mixing tank, the material is mixed by mixing arm, when the material is mixed, it is in pour and put the material to grouting pump.
