

1. Summary

This pump has many advantaged characters of simple structure. It has been using for sealing, strengthening and stabilizing of rock.

Recommended pumping material: Cement/water Slurry or similar Slurry

2. Main Technical Data

Rated Output:	10L/min
Rated Pressure:	1Mpa
Piston Dia. :	110mm
Piston Stroke:	42mm
Outlet Dia. :	19mm
Inlet Dia. :	25mm
Weight:	42kg

3. Operation

Joint Inlet hose and outlet hose, the length is less 3m, put the inlet hose into the hopper, Please Rocker rocking back and forth, the material under the piston, and discharge via the outlet hose, and pressure along the feeding hose

4. Notes

Please clean the machine and hose when finish the working

Please regularly injected into the butter to machine
